

## SUMMARY

### **New stations of Hermit Beetle *Osmoderma eremita* (Scopoli, 1763) in the Mazovian Lowland (Nizina Mazowiecka, Central Poland)**

Two new localities of Hermit Beetle (Coleoptera, Scarabeidae) were recorded in the villages Roztoka (52°18' N, 20°37' E) and Zawady (52°15' N, 20°25' E) in the Kampinos National Park in 2005-2006. This species was included into Polish Red Book (as vulnerable) and is protected since 1995.
