

## SUMMARY

### **Stations of *Bufo calamita* in the Zamość town region**

The paper presents the distribution of *Bufo calamita* in the former Zamość voivodship and briefly describes its particular localities. In the years 2001-2003 altogether 12 new stations of the species were recorded in the existing and proposed protected areas of the region. Therefore *Bufo calamita* localities may be more numerous, particularly in the Solec Primeval Forest, and Tanew and Wirowa Rivers valleys. Habitats favorable for the species there occur.
