

## SUMMARY

### **A new locality of *Epipactis microphylla* (Ehrh.) Sw. in the Opole Silesia**

In 2006 a new locality of *Epipactis microphylla* was found on the Szpica Mount near Gogolin in the Opole Silesia (square CF17 of the ATPOL grid; 50°30' N, 18°04' E). Small population (3 specimens) grows here in the forest community from *Cephalanthero-Fagenion* suballiance.
