

SUMMARY

New vascular plant species of the Ojców National Park

The paper contains a list of 8 new species found in the Ojców National Park during botanical studies from 2002 to 2004. The taxa new to OPN are: *Aster novi-belgii* L., *Crepis paludosa* L. (Moench), *Deutzia scabra* Thunb., *Echinops sphaerocephalus* L., *Geum rivale* L., *Lactuca serriola* L., *Lupinus polyphyllus* Lindl., *Sicyos angulata* L.. Two of them belong to native species (*Crepis paludosa*, *Geum rivale*) and another to the anthropophytes.

The materials of species are deposited in Herbarium of the Ojców National Park (OPN).
