

## SUMMARY

### ***Cortinarius violaceus* (Fr.) Fr. in the region of Skarszew village by the Borówno Wielkie Lake (pomorskie province)**

A station of *Cortinarius violaceus* in summer 2003 in the region of Skarszew village was found. It is situated on the southern shore of the Borówno Wielkie Lake. A few dozen fructifications grew in litter with grass and moss, in the vicinity of *Pinus sylvestris*, *Picea abies*, *Betula pendula*, *Populus tremula* and *Fagus sylvatica*. A list of macromycetes occurring nearby was made. Altogether 20 species of *Basidiomycetes* group were specified.
